

# Worm Factory

## How It Works:

Simply add a handful of worms and your organic waste to the bottom tray. The worms will start processing the food. Once the bottom tray is filled add another tray. The worms migrate upward to the newest food source leaving the bottom tray full of nutrient-rich compost.

As waste is broken down, moisture filters through the system, taking nutrient-rich particles with it. This makes it possible to harvest organic liquid fertilizer right from the spigot.

## Description:

Composting with worms allows you to turn kitchen scraps, paper waste and cardboard into nutrient-rich soil for your plants. The Worm Factory® 360 composting system makes the entire process quick and easy.

With a thermo siphon air flow design, the Worm Factory® 360 increases the composting speed. Now you can produce compost much faster than traditional composting methods. Master Gardeners agree, worm castings are one of the richest forms of fertilizer that you can use.

The Worm Factory® 360 can be used indoors or outdoors allowing year round production. Now composting is no longer limited to backyards. The Worm Factory® 360 is odorless making it great for apartments, kitchens, garages, porches and more.

## Features:

- Year-round production
- Odor Free operation
- Available in four tray system
- Expandable up to 8 trays
- Easy to assemble and manage
- Built in "worm tea" collector tray and spigot for easy draining
- Includes a 16-page easy-to-use instructional booklet with photos and illustrations
- Comes with "Quick-Tips" lid for easy reference
- Houses eight to twelve thousand worms that consume 5-8lbs of food per week
- 20 year warranty on parts and workmanship
- Made in the U.S.A.
- Made with post consumer recycled materials.
- 30 year life expectancy.

*no meat/dairy  
rinds (frozen)  
coffee grounds  
juice*

### Internet:

Search "Worm Composting" (purchase price depends on the number of trays.  
\$75.00 - \$110.00)

Search "Red Wiggler worms" or "Eisenia fetida" (official name)  
(Price around \$20.00 for 1000 worms.)

*1000 worms @ \$20.00*
